

# Co-Parenting Communication Report

Prepared by the children's mother · Other parent: Dave

Children: Emma, Liam · Period analyzed: 2017-01-01 to 2024-01-01 · Generated: 2026-05-19 · Analyzed in 12 time windows

## Nature of this document — read first

- This report organizes events extracted from the mother's own text-message history. The original messages are the evidence; every item below quotes its source message so it can be verified.
- It was produced with the assistance of automated (AI) analysis, which can miss or misclassify messages. All counts and percentages are estimates and should be independently verified.
- It covers text messages only — not school, medical, or court records.
- It is an organizational aid, not legal advice and not a substitute for counsel's review.

## Overview

Across the full period analyzed, the communications show the mother coordinating the large majority of childcare, medical, and school logistics for Emma and Liam. The father cancelled, missed, or asked to reschedule parenting time on numerous occasions, and several stretches show no outreach from him about the children. Multiple third parties describe the mother as the primary caregiver.

Note: West Virginia's family-court (SCA-FC) forms are uniform statewide — the county determines the filing court and any local cover sheets or fees, not the form set itself. File the completed packet with the Circuit Clerk / Family Court in Kanawha County, West Virginia, and confirm the current forms and any county-specific addenda with the court or counsel.

## Custody Breakdown

Childcare instances identified — with mother: 86; with father: 16; shared: 0; unclear: 8.

Childcare instances were counted from messages that explicitly state a parent had, picked up, or was caring for a child. Counts reflect what the messages state and do not capture every day of actual care.

### Custody split — share of childcare instances

### Care pattern over time — childcare instances per month

- <sup>2</sup> Automated extraction can miss or misclassify messages; counts are estimates.
- <sup>2</sup> The analysis covers text messages only — not school, medical, or court records.
- <sup>2</sup> This report was assembled from multiple time-windowed analysis passes; a communication gap spanning a window boundary may be split or under-counted.

# Appendix: Message Log

2000 messages, chronological. Each carries a reference ID — T# for texts, E# for emails — cited by the timeline markers and evidence entries. This appendix is capped at the first 2,000 messages — the original export file is the authoritative complete record and should be provided alongside this report.
