Prepared by the children's mother · Other parent: David

Nature of this document — read first

- This report organizes events extracted from the mother's own text-message history. The original messages are the evidence; every item below quotes its source message so it can be verified.
- It was produced with the assistance of automated (AI) analysis, which can miss or misclassify messages. All counts and percentages are estimates and should be independently verified.
- It covers text messages only — not school, medical, or court records.
- It is an organizational aid, not legal advice and not a substitute for counsel's review.

Overview

Across the full period from the July 2020 divorce through June 2025, the messages document a co-parenting relationship in which the mother (Sarah) consistently handled the majority of weekday caregiving, school, medical, dental, and activity logistics for Emma and Noah, while the father (David) exercised primarily every-other-weekend and holiday time. David's involvement grew over time, moving from a 2020–2021 period marked by cancellations and a multi-week silence in spring 2021, through more cooperative engagement in 2022–2023 around Noah's reading tutor and Emma's driver's permit, to a January 2025 proposal for 50/50 joint custody supported by his increased participation in Scouts, driving practice, and some appointments. Throughout the period, the mother continued to manage most scheduling, registrations, and appointments, and several of David's scheduled visits were cancelled, rescheduled, or missed, including the June 4, 2024 recital and a notably late pickup in the final window. Both parents negotiated a 2024 schedule and an August 2024 cost/time split, and messages reflect joint problem-solving on specific issues even as the day-to-day division of labor remained uneven. Merged totals across the four windows record 74 childcare instances (36 with mother, 38 with father), 16 missed or cancelled visits, 7 communication gaps, 104 responsibility events, and 29 third-party statements.

Custody Breakdown

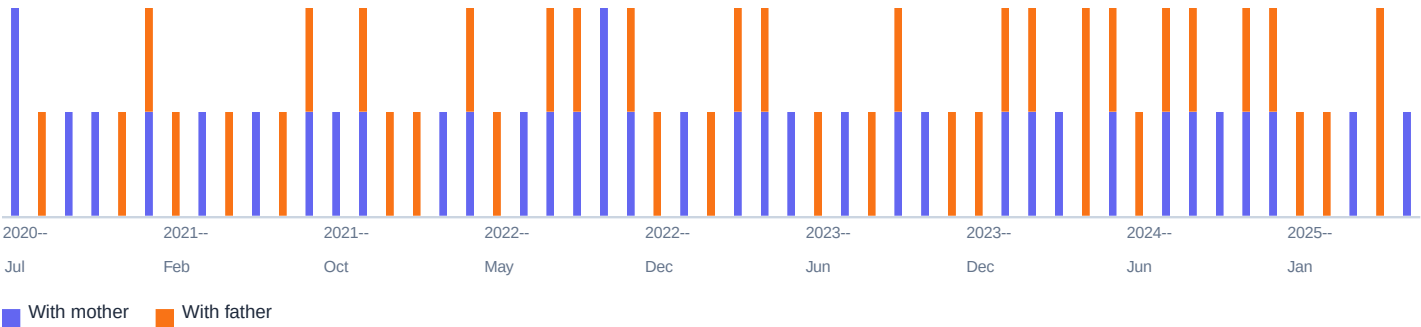

Childcare instances identified — with mother: 36; with father: 38; shared: 0; unclear: 0.

Childcare instances were counted from explicit statements in the message transcripts within each window (e.g., a stated weekend pickup, a documented overnight, a specific appointment or activity day) and then summed across the four windows. Each instance was attributed to the parent identified in the message as having the child or performing the caregiving act; instances that could not be attributed were marked shared or unclear (both zero in the merged totals). The total is reliable as a floor for what the messages document but is not a complete record of physical custody, because uncommunicated days, routine exchanges that generated no message, and time covered by third parties are not captured.

Tone of Co-Parenting Communications

Overall, communications about the children are predominantly brief, logistical, and businesslike across all four windows. The earliest window shows the most tension, with the mother expressing concern and frustration around David's cancellations and the spring 2021 silence, though without overt hostility. The middle windows (2022–2024) are notably more cooperative, with evidence of joint problem-solving on Noah's reading support, Emma's driver's permit, and a negotiated 2024 schedule and cost split. The final window remains civil and factual but somewhat strained, with measured expressions of frustration from the mother about a no-show and a late pickup, and a direct, respectful exchange in January 2025 about David's 50/50 custody proposal. No insults, threats, or openly hostile language appear in any window.

Limitations & Caveats

- ² This analysis was performed in multiple time-windowed passes and then merged; a communication gap, missed visit, or event straddling a window boundary may be split across windows or under-counted.
- ² Childcare and parenting-time counts are estimates derived only from what is described in the messages and do not reflect a verified day-by-day record of actual physical custody.
- ² Some weekends, exchanges, and events likely occurred without a corresponding message and are therefore not captured.
- ² Where messages state intent or future plans (e.g., 'I'll drive her,' 'Have the kids this weekend'), the analysis treats the stated plan as the event; actual completion is not independently confirmed.
- ² The transcript does not include the underlying divorce decree or any parenting order; the every-other-weekend reference comes from David's own message rather than a court document.
- ² Financial contributions (camp deposits, dental payments, school supplies, dance fees, copays, soccer/Scouts fees) are noted as stated but require receipts, EOBs, and bank records for verification.

²

Some school notices addressed to both parents (e.g., emails to 'Mr. and Mrs. Miller') do not identify which parent acted and are marked unclear.

- 2 Third-party statements (e.g., Linda, Ms. Thompson, Coach Reyes) appear in the transcript but relationships are sometimes inferred, and these statements should be confirmed directly with the source if used substantively.
- 2 Email attachments referenced in the transcripts (report cards, camp invoices, etc.) were not provided in the message bodies and still need to be obtained.
- 2 Message analysis cannot substitute for official school, medical, dental, optometry, camp, DMV, employment, or court records.
- 2 Attributions marked 'shared' or 'unclear' should be reviewed by counsel against the underlying documents.
