

Co-Parenting Communication Report

Prepared by the children's mother · Other parent: Dave

Children: Emma, Liam · Period analyzed: 2024-01-06 to 2024-05-10 · Generated: 2026-05-17

Nature of this document — read first

- This report organizes events extracted from the mother's own text-message history. The original messages are the evidence; every item below quotes its source message so it can be verified.
- It was produced with the assistance of automated (AI) analysis, which can miss or misclassify messages. All counts and percentages are estimates and should be independently verified.
- It covers text messages only — not school, medical, or court records.
- It is an organizational aid, not legal advice and not a substitute for counsel's review.

Overview

The transcript shows the mother (Me) as the primary day-to-day caregiver for Emma and Liam, handling medical appointments, school conferences, and emergency contact duties. The father (Dave) cancelled or rescheduled several scheduled visits and was late to at least one pickup, though he did take the children one weekend in late March. A maternal grandmother message corroborates that Dave had not visited for a period and that she helped with overnight care. Communications about the children are brief and largely logistical, with the mother often initiating and Dave sometimes not responding.

Custody Breakdown

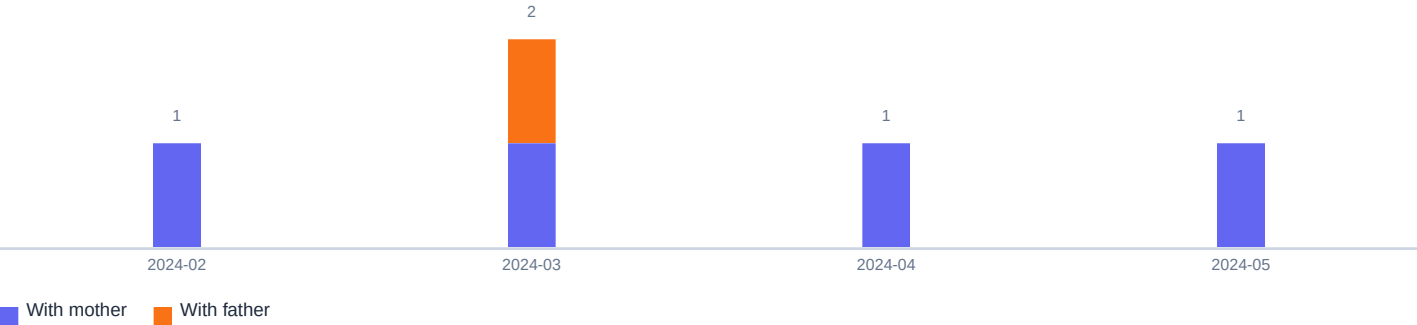

Childcare instances identified — with mother: 4; with father: 1; shared: 0; unclear: 0.

Childcare events were identified only from messages explicitly stating a parent had, picked up, or cared for the children. Counts reflect what is documented in messages and do not capture unmentioned care periods.

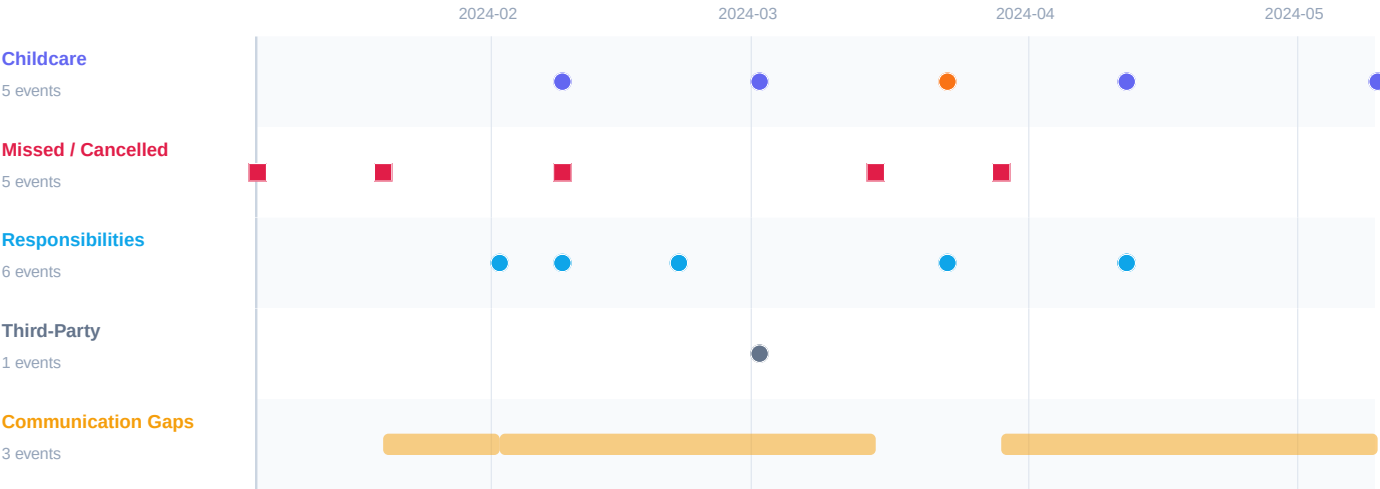

Custody split — share of childcare instances

Care pattern over time — childcare instances per month

Tone of Co-Parenting Communications

Communications about the children are short, logistical, and largely one-directional. The mother sends informational updates and reminders; Dave's replies are brief, frequently involve cancellations or schedule changes, and several mother-initiated messages receive no reply. The tone is not overtly hostile but reflects limited cooperation and intermittent responsiveness from Dave.

Limitations & Caveats

- 2 Counts of childcare and missed visits are derived only from messages in this transcript and are not a complete record of actual time spent with either parent.
- 2 The transcript does not establish the underlying custody schedule or court order, so cancellations cannot be measured against an agreed baseline.
- 2 Some entries (e.g., the May 10 statement that Liam has been with the mother all month) reflect one parent's assertion and are not independently corroborated within the messages.
- 2 Message analysis cannot replace official school, medical, or court records, which would be needed to verify attendance, emergency-contact status, and appointment history.
- 2 Communication gaps reflect only the absence of messages in this transcript; communications may have occurred through other channels not included here.
